The production of our bags causes emissions that we cannot completely avoid through optimization measures. We make a financial contribution to the climate for these unavoidable emissions related to our inventory program and support climate protection projects in this way, mostly in the countries where our products are manufactured. You can read more about the climate contribution of unavoidable product emissions [here](#). This means that when you purchase a HALFAR® bag from our range of promotional items, these **emissions are already offset from the Bielefeld warehouse**.

Values calculated by Climate Partner based on the „Greenhouse Gas Protocol Product Life Cycle Accounting and Reporting Standard “(GHG Protocol)		

**System boundary and methodology of determining the CO<sub>2</sub> values:** When calculating the values, the “**cradle-to-customer plus waste**”- Ansatz pursued. Thus, the results include the following life cycle phases of our articles:

the extraction of raw materials and packaging,

- the corresponding logistics processes,
- the production of the product,
- the delivery of the product to the customer's factory gate, and
- the corresponding disposal emissions of the product as well as the packaging
